3. Once your login is complete, if you are not prompted to review access, click on the notification flag in the upper right-hand corner, then select "Company Access Setup is incomplete".

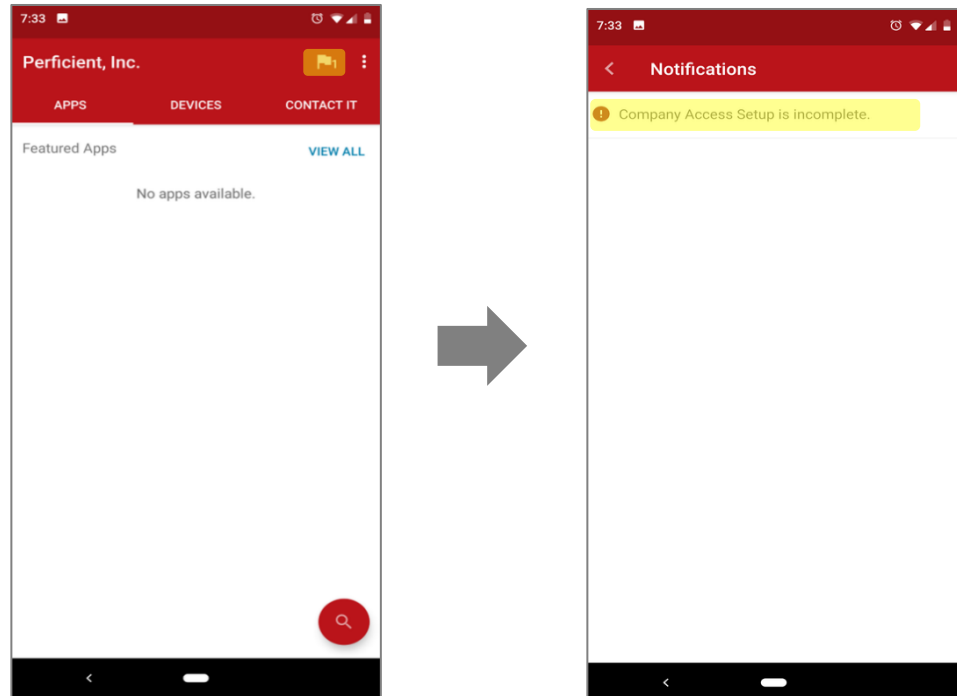

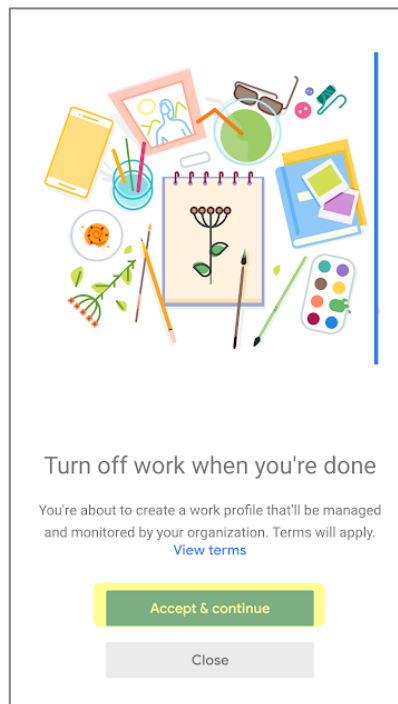

4. When prompted to review access, click **Continue** on the following two screens.
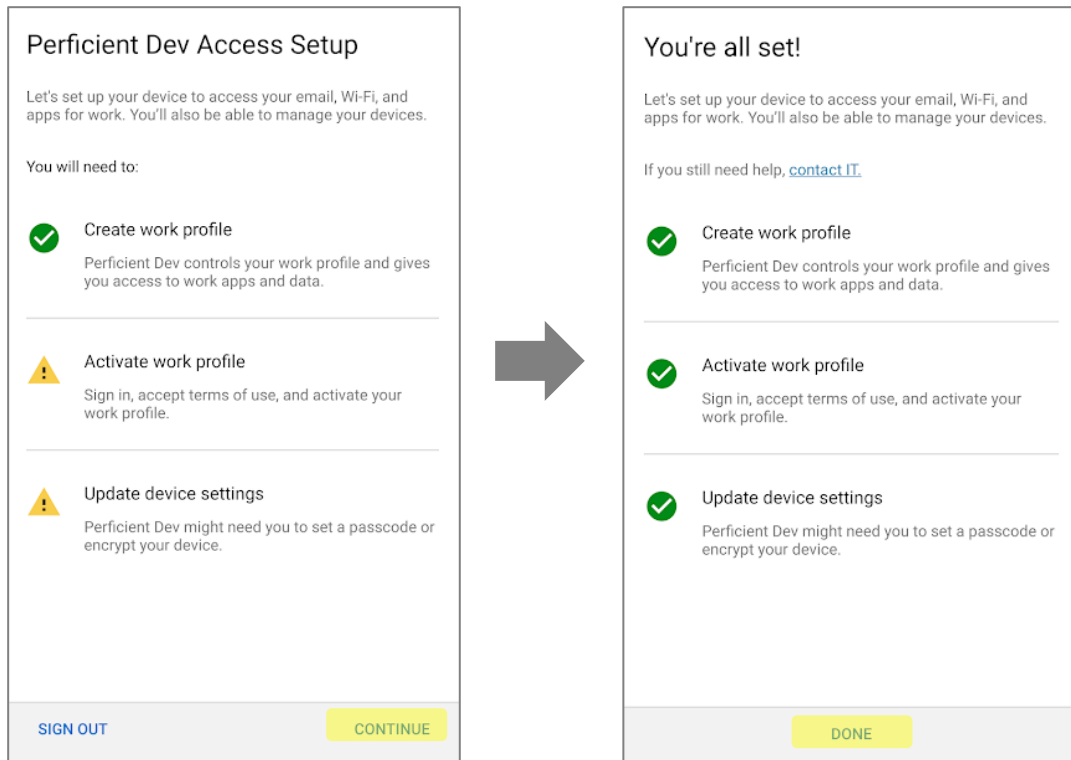

5. Click **Next** on the following screen to approve permission and verify that your device is encrypted.

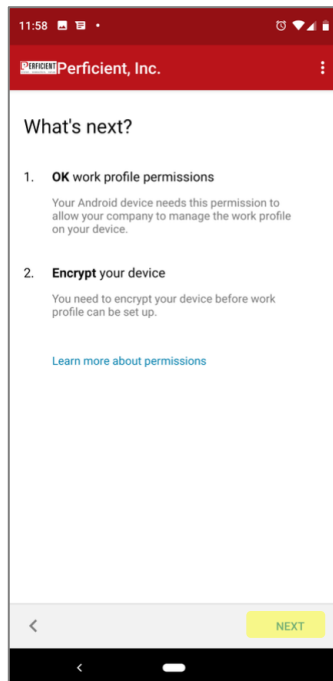

6. Click **Accept & continue.**

7. Click **Continue** and then **Done** on the following screens. Enrollment is now complete.

8. Please launch the Company Portal app, please note that you must open it from the **work profile** created. If you see the message "**You're halfway there**" you have opened the app from your personal profile. Please close and relaunch from the work profile. Work profile view differs based on device, please see examples below:
9.  In the Company Portal app, click on the **ellipsis** in the upper right-hand corner and then Settings. Scroll to the bottom and click **enable browser access**. Click **OK**.

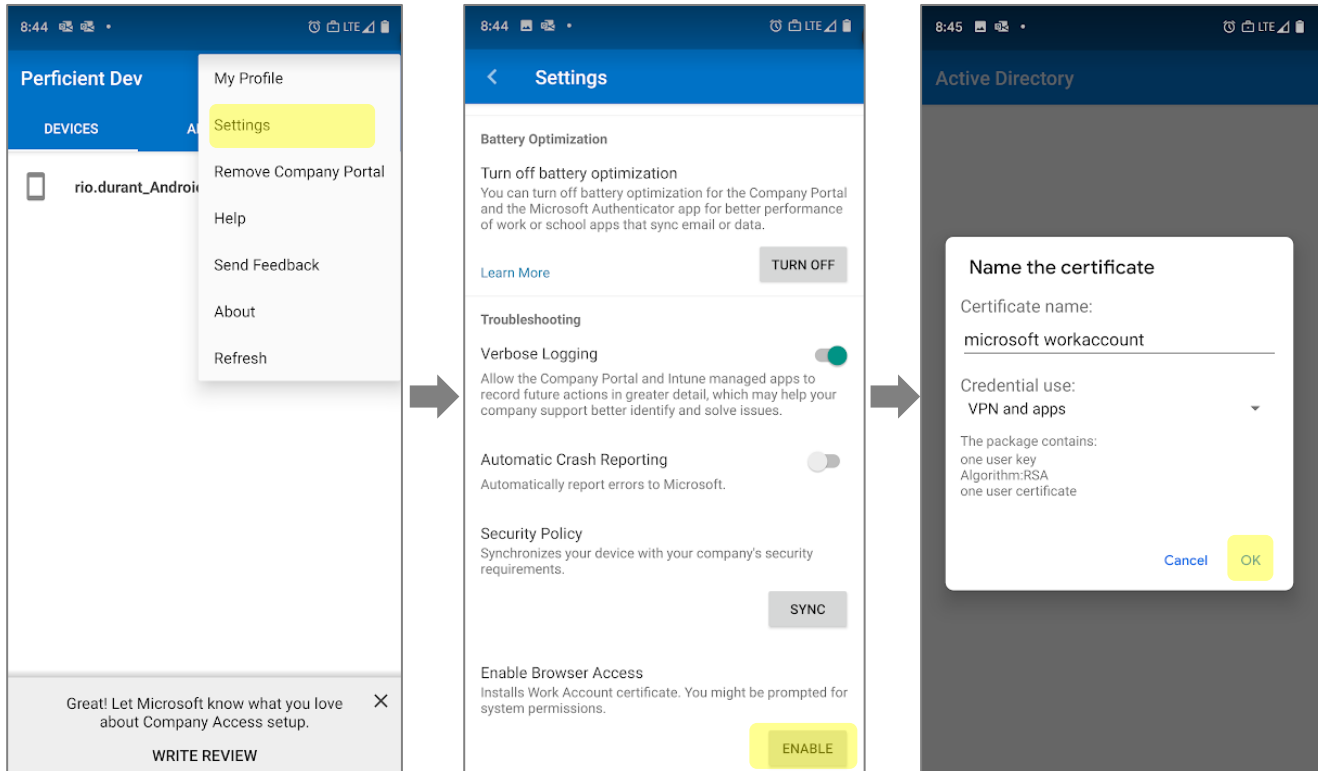

10. Shortly after enrollment, you will receive notifications that the following apps are being downloaded and installed in your work profile: **Outlook, OneDrive, Word, Excel, Azure Information Protection, Microsoft Authenticator** and **Intune Managed Browser**. We have also deployed OneNote and PowerPoint as available to install if needed. Those can be installed from Google Play inside the work profile.
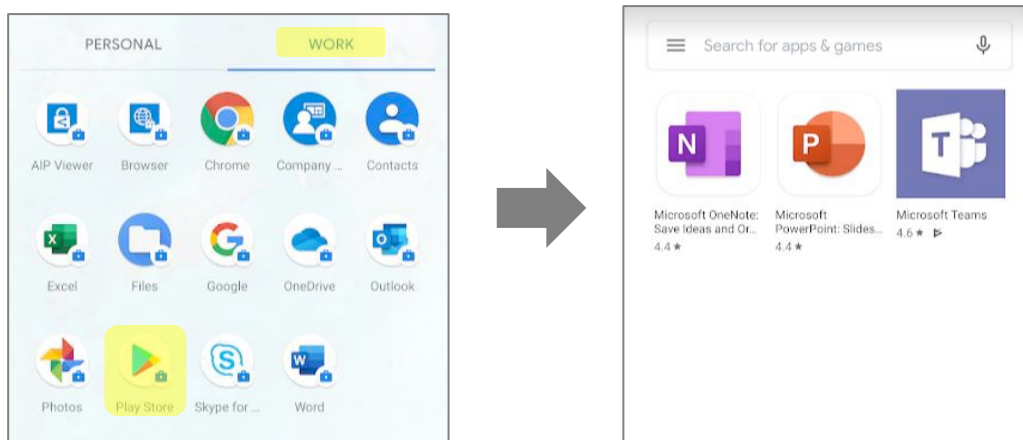

## Setup Microsoft Outlook App on Android Device

The following section will walk you through setting up your Perficient mailbox on the Microsoft Outlook App for Android.

1. From your **work profile** mentioned in step 8, launch Outlook. Click add account, enter in your email address and click **continue**. Click **Skip** on adding an additional account. Your email is now setup in Outlook within your work profile. *If you already have Outlook installed you will have a version in your personal profile as well, however you will need to launch from your **work profile** in order to continue to have access to Perficient email.

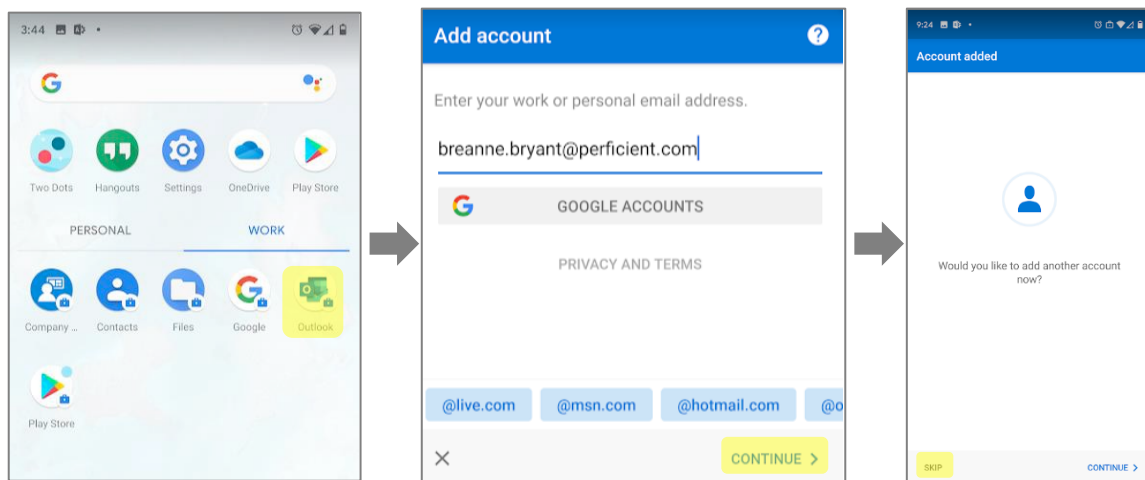

## Setup Microsoft OneDrive for Business on Android Device

The following section will walk you through setting up OneDrive for Business for Android.

1. From your **work profile** mentioned in step 8, launch **OneDrive**. Click **Sign in** then click **OK**.
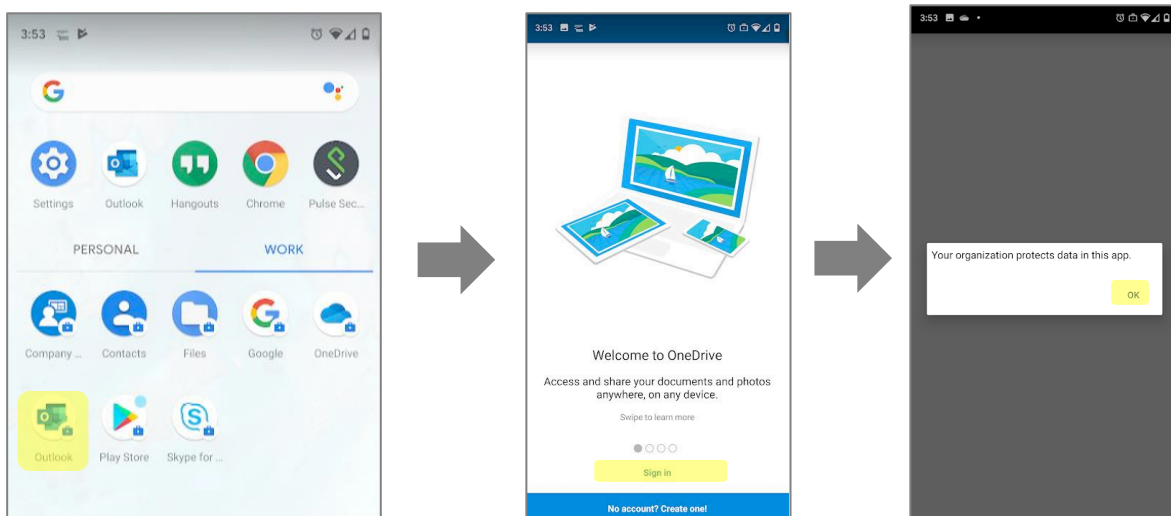

## Setup AIP Viewer on Android Device

The following section will walk you through setting up Azure Information Protection for Android. This will allow you to view email attachments that are not in a Microsoft App format.

1. From your work profile mentioned in step 8, launch AIP viewer. Click Allow on the next two screens to grant permission. Click Skip, screen will now display All Set, you can close the app.

## Remove Company Portal App from Personal Profile

The following section will walk you through removing the Company Portal App from your personal profile.

1. From the personal profile, locate Company Portal app, hold down and drag to uninstall
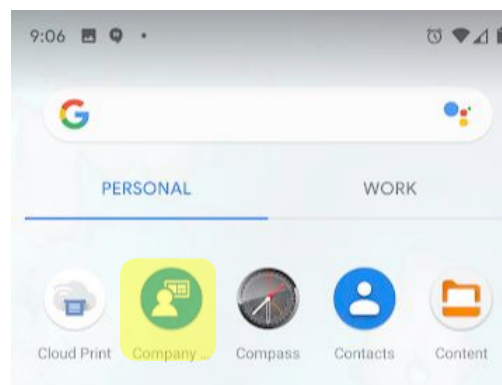

Remove Email from your Native App on Android Device

The following section will walk you through removing your Perficient mailbox from the native app on an Android device. Based on the manufacturer of your device these instructions might vary.

1.  Open Settings and click on Accounts. Locate the account that has your Perficient email address with Exchange underneath, do not select the one that has work account. Click on Remove Account.

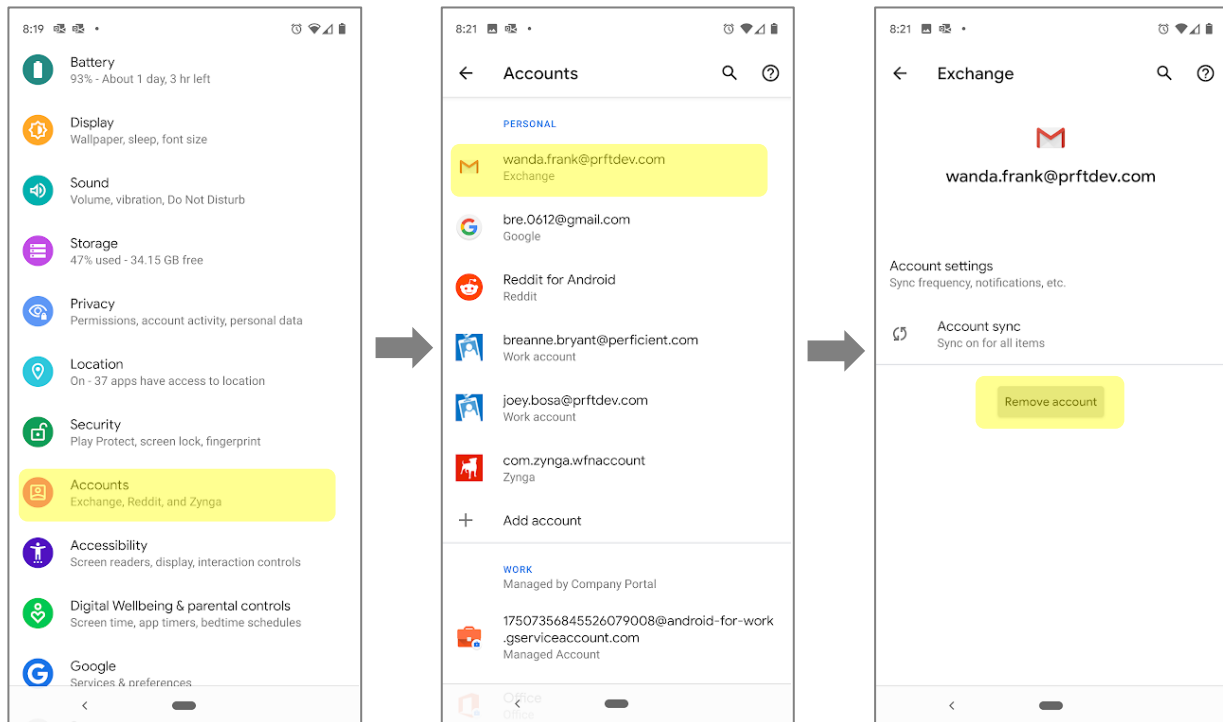

| Please note the following limitations |
| --- |
| a.  All web links will be opened in the Intune Managed Browser App<br>b.  You will not be able to save Perficient data to your local device.<br>c.  Cut/Copy/Paste will only work between your managed apps in your work profile<br>d.  Your work profile is separate from your personal profiles, your photos and documents saved to your local device are not viewable by any apps in the work profile. As a result, you will not be able to attach any locally saved documents or photos to emails in your work profile.<br>e.  Taking screenshots is blocked inside of managed apps.<br>f.  If you are enrolled and Outlook is asking you to enroll, verify that you are not attempting to use Outlook in your personal profile.<br>g.  If you are unable to open photo or audio attachments in Outlook, please verify step 13 is completed. |
